

Premium Silicone

High-Temp!

Red 100% RTV Silicone Adhesive Sealant

Features & Benefits

Wear-Con High-Temp Red **Premium Silicone** 100% RTV Silicone Adhesive Sealant is an industrial grade caulking adhesive sealant which cures at room temperature to a tough rubbery solid. **Wear-Con Premium Silicone** can be applied overhead without sagging, and adheres to almost any clean surface, including metal, glass, most woods, ceramics, painted surfaces, and many other areas.

Installation

Wear-Con High-Temp Red **Premium Silicone** is easy to install either by hand or using a caulking gun. To insure product integrity of unused portions, cut high on nozzle and replace cap after use.

Technical Specifications

Wear-Con High-Temp Red **Premium Silicone** adheres to surfaces in extreme working temperatures from -76°F to 450°F continuously, and up to 650°F intermittently; has a 20 ppi peel strength; and tensile strength at 350 psi (4 MPa).

Sizes

Wear-Con High-Temp Red **Premium Silicone** is available in 3 oz. squeeze tubes and 10.3 oz. tubes (see table below). 5 gallon buckets available upon request.

(See reverse for Wear-Con High-Temp Red **Premium Silicone** sizes, standards and applications.)
