

SKIRTBOARDS

SkirtBoards™

Conveyor Sidewall Protection

Features & Benefits

Wear-Con **SkirtBoards™** are custom made of **SHC800™** Wear Panels and a backer plate that can be made from a variety of wear materials to suit your needs. **SHC800™** Wear Panels are cast from high-chrome white iron with a hardness of 55 to 58 HRC. The backing can be made from **WC400™**, **WC500™**, or **INERTIA™** Tactical Wear Plate. This Wear-Con custom combination is unique and unsurpassed in impact, abrasion, and corrosion resistance; and they easy to install and replace.

Installation

Wear-Con **SkirtBoards™** can easily be bolted or welded into place.

Technical Specifications

Wear-Con **SkirtBoards™** provide maximum abrasion resistance along with the ability to withstand temperatures up to 900°F. **SkirtBoards™** will outlast alloy plate and perform to abrasion standards similar to ceramics.

Sizes

Wear-Con **SkirtBoards™** are custom designed to fit into your particular drag or belt conveyor system.
