

Rampart™ Chocos

WC810™ & WC880™

Features & Benefits

Wear-Con **WC810™ & WC880™ Rampart™ Chocos** are excellent in impact, abrasion, erosion and corrosion resistance and they are easy to install and replace. **Rampart™ Chocos** have an eutectic composite that demonstrates very high abrasion and impact resistant properties that substantially reduce wear while providing considerable savings in

down time and lost production. **Installation**

Wear-Con **WC810™ & WC880™ Rampart™ Chocos** are welded into place via their mild steel backing.

Technical Specifications

Wear-Con's **Rampart™ WC880™ & WC810™** are made of extremely strong abrasion resistant composites. **Rampart™ WC880™** Matrix Carbide Technology is made with blended carbides with a minimum hardness of 770 Hv, and carbides up to 1500 Hv crystalized in a metallic compounded while bonded to a steel backing plate. **WC880's** eunique Matrix Carbide structure performs with very high impact and sliding abrasion resistant properties that not only reduce wear, but provide considerable savings in down time and lost production. **Rampart™ WC810™** High Chrome Technology combine the very high wear resistant qualities of a high chrome white iron, (700 BHN) while also being bonded to mild steel to create a product that is exceptionally resistant to impact and sliding abrasion while retaining ductile characteristics

Sizes

Wear-Con **WC810™ & WC880™ Rampart™ Chocos** are available in several sizes. (See chart)
