Professional | Knowledgeable | Innovative

## Your problems are complex.

**Wear-Concepts' Engineering Service** understands. Our engineering department is professional, knowledgeable, and innovative; and will work to reduce your downtime and increase your profits. Our experienced engineers help our customers by providing in-house engineering services and combining interdisciplinary project teams, especially in the fields of cost controlling, preventative wear, repair, and replacement. Involved in all phases of the product development process from site visits to support services for manufacturing and installation, **Wear-Con's** staff of full-time engineers is ready to assist you with your toughest wear problems; utilizing all of the resources and knowledge that **Wear-Con** has to offer. When it comes to product support, **Wear-Con** is the leader in the industry. Our engineering staff is always available for on-site evaluations, and can custom-design parts to meet your specific wear specifications. Get the most from your equipment. Contact **Wear-Con** today!
